

Welcome, Garrett.

Your AI Agent Setup — Everything You Need to Know

TBD · TBD

What to Expect

BEFORE THE CALL

- Complete the Pre-Session Prep Guide (~15 min)
- List your daily tools and apps
- Think through your top 3–5 work domains
- Identify your most time-consuming recurring task

DURING THE CALL (60 MIN)

- Walk through your goals, tools, workflows, and preferences
- We'll define your agent's personality and boundaries
- Map out your top automation opportunities

AFTER THE CALL

- We build your full agent system within 5 business days
- Deployment + walkthrough call included
- You own everything — all files, skills, and configs

What You'll Walk Away With

Fully Configured AI Agent

Running on your own infrastructure — your device, your cloud

Custom Skills

Step-by-step automations for your top recurring workflows

Domain Expert Systems

Self-improving knowledge bases for each area of your work

Scheduled Automation

Cron jobs for morning briefs, reports, and recurring tasks

Complete Documentation

Every component explained — so you can grow it yourself

Walkthrough Call

Live demo showing exactly what your agent can do

Have These Ready

☐

List of apps & tools you use daily (Gmail, Notion, Slack, etc.)

☐

Any existing API keys (Anthropic, OpenAI, Brave, Stripe, etc.)

☐

Access to the device where your agent will run (Mac Mini, VPS, laptop)

☐

Your phone for WhatsApp or Telegram channel setup

☐

Rough idea of your 3–5 work 'departments'

☐

The most annoying recurring task you'd love to never do again

Session link: TBD

Prefer to Talk? Use Voice Intake Instead

Join this Meet link and speak your answers — it auto-transcribes, nothing gets lost.

TBD

1 Your Tools

Walk through every app you use at least weekly. What do you use it for?

2 Your Departments

If you hired 3–5 people to replace you, what would each person own?

3 Your Most Annoying Task

One recurring task that takes 30+ min and follows the same steps every time.

4 Perfect Morning Briefing

What would a useful daily AI message tell you? Data, format, tone?

5 Agent Personality

What should your agent call you? Professional, casual, playful?

[illegible]

Exercise 2 — Your Departments

If you hired 3–5 people to replace you, what would each person own? Give each role a name.

1

e.g. "Content Production"

→ Owns:

2

e.g. "Business Development"

→ Owns:

3

e.g. "Client Ops"

→ Owns:

4

e.g. "Personal Admin"

→ Owns:

5

→ Owns:

Exercise 3 — Your Most Annoying Task

The one recurring task you'd love to automate away forever.

The task

How often

Rough steps (bullet by bullet):

⚡ This is usually the first skill we build for you.

Exercise 4 — Your Perfect Morning Briefing

What would make you say "this message is incredibly useful" every morning?

☐

Weather for today

☐

Priority emails / messages

☐

Social media analytics

☐

Project status updates

☐

Content performance (views, engagement)

☐

Other: _____

☐

Calendar summary

☐

News in my industry / niche

☐

Task list / to-dos

☐

Financial summary (revenue, expenses)

☐

Custom metric or data feed

Bonus — Your Agent's Personality

No pressure — we'll brainstorm on the call. Just start thinking.

What should your agent call you?

First name? Nickname? Title? (e.g. Greg, G, Boss)

What vibe do you want?

Professional assistant · Casual friend · Sharp executive · Playful

Professional

Casual

Sharp

Playful

Custom

Got a name in mind for your agent?

Human name, creative name, acronym — or we'll brainstorm together

60-Minute Session — What We'll Cover

**Phase 1****Identity & Soul**

Define who your agent is

15 min

Phase 2**Tools & Infrastructure**

Map your tech stack

15 min

Phase 3**Domain Discovery**

Map your top workflows

30 min

Phase 4**Autonomy & Safety**

Set permissions and limits

10 min

Phase 5**Synthesis**

Review and confirm everything

10 min

Delivery Timeline

Timeline	What Happens
Day 1	Process your transcript — build workspace files (SOUL.md, USER.md, etc.)
Days 2–3	Build domain expert systems — one per department
Days 3–4	Quality validation and testing
Days 4–5	Deployment to your OpenClaw instance
Day 5–7	Walkthrough call — live demo of your full agent

You'll receive: all workspace files · expert systems · deployed skills · quality report · walkthrough call

Term	What It Means
OpenClaw	The platform that runs your AI agent 24/7 — the OS for your personal AI
Agent	Your AI assistant. Has a name, personality, memory, and skills
Gateway	Keeps your agent online and connected to messaging channels
Workspace	The folder where all your agent's configuration lives
SOUL.md	Your agent's values and communication style — like a constitution
MEMORY.md	Long-term facts your agent should never forget
Skill	A specific task your agent knows how to do — like a recipe
Cron job	A scheduled task that runs automatically (e.g. morning briefing at 7am)

Skills, Automation & Autonomy

Term	What It Means
Domain	A 'department' of your work (e.g. Content, Business, Personal)
Workflow	A repeatable process within a domain
Trigger	What starts a workflow: time, event, heartbeat, or on-demand request
Heartbeat	Periodic check-in — agent wakes up every 30 min to run a checklist
Approval gate	A point where the agent stops and asks you before continuing
Blast radius	What happens if something goes wrong — determines autonomy level
Autonomy level	How independent your agent is: ask-everything ↔ just-get-it-done
Expert system	Self-improving knowledge package for one domain — gets smarter over time

AI Models — Quick Reference

Model	Speed	Cost	Best For
Haiku	Fast	\$	Simple tasks — file moves, data extraction, formatting
Sonnet	Balanced	\$\$	Most tasks — writing, research, scheduling, analysis
Opus	Thorough	\$\$\$	Complex judgment — strategy, quality review, edge cases

MOST POPULAR

Foundation

\$1,500

1–2 Domains
