

GB Automation

Build agents, not decks.

The shift

Every SMB has data flow problems.

AI agents can run them, today.

The window to build a moat is now.

Wait, and your competitor automates first.

Three-step engagement

Sprint: 7-day agent team build.

Co-Pilot: I am in your agent chat, daily.

Engineering Partner: I run your AI team.

1 AI Sprint

\$999

7-day agent team build.

- Day 1: 60-min scoping call.
- Days 2-6: agent team built + deployed.
- Day 7: handoff session + runbook.
- Deliverables: working agents, runbook, recording.

2 AI Co-Pilot

\$2,999/mo

I am in your agent chat. Daily.

- Daily async in your shared agent chat.
- Weekly 60-min working session.
- Tweaks, fixes, new agents on demand.
- Upgrade when: 3+ new agents per month.

3 AI Engineering Partner

\$9,999/mo

I run your AI team. You run your business.

- Embedded AI engineering function.
- Roadmap, build, monitor, iterate.
- Weekly exec sync + monthly review.
- Includes everything in Co-Pilot.

The bundle

Sprint + Co-Pilot at signup.

First month: \$3,000 flat.

Then: \$2,999/mo, cancel anytime.

You skip the gap between build and ops.

Proof

1-person shop, agent-native delivery.

Active engagements: Fisch Group, Eagle Acquisitions, Sylvan Hills.

Stack: Hermes agents, Claude Code, OpenClaw runtime.

Live build pipeline: 5+ TAC builds shipped per week.

The 30-day promise

Day 0: 60-min discovery call.

Day 7: working agent team in your stack.

Day 30: full handoff or seamless Co-Pilot.

If we miss, you do not pay the Sprint fee.
